ROADMAP FOR CASHBACK REALTY

Your 4 month plan to fill the calendar.

Every step, in order, from the day we start to the day meetings land. Built around your business, not copied from anyone else's.

20 days
to build your system

3 months
to run and improve it

30 to 50
meetings a month is the goal at full pace

STEP 1

First, we study your business.

Before we send one email, we learn how CashBack Realty makes money, who says yes to you, and why. That's what makes the emails feel like they were written by someone on your team.

1

Your offer

Developers pay a commission on new and off-the-plan sales. You pass up to half back to the buyer after settlement, and it costs them nothing. Simple, strong, and we'll lead with it.

2

Your buyers

First-home buyers, investors, commercial buyers, downsizers. We work out who is easiest to reach and quickest to say yes.

3

Your projects

The builders and developers you work with, and which projects need buyers most. More projects means more people to match.

4

Your partners

Brokers, accountants and buyers' agents who talk to buyers every day. They can send people your way, within the rules.

✎ **What you get:** a one page Business Brief. It shows what we learned, who we'll go after first, and why. You read it and tell us if we got it right.

Two quick wins we already noticed on your site: add a booking button next to "Get My Free Cashback Estimate", so warm people can book right away. And swap the example buyer story for a real one, with the buyer's OK. Both help more meetings turn into deals.

THE BIG PICTURE

20 days to build. 3 months to grow.

About 4 months from day one. First we build the whole system by hand. Then we start slowly, and speed up only when the numbers say it's safe.

1 **Days 1 to 20**
We build everything

2 **Month 1**
Slow and steady launch

3 **Month 2**
Build up and tune

4 **Month 3**
Full pace

How many emails go out each month

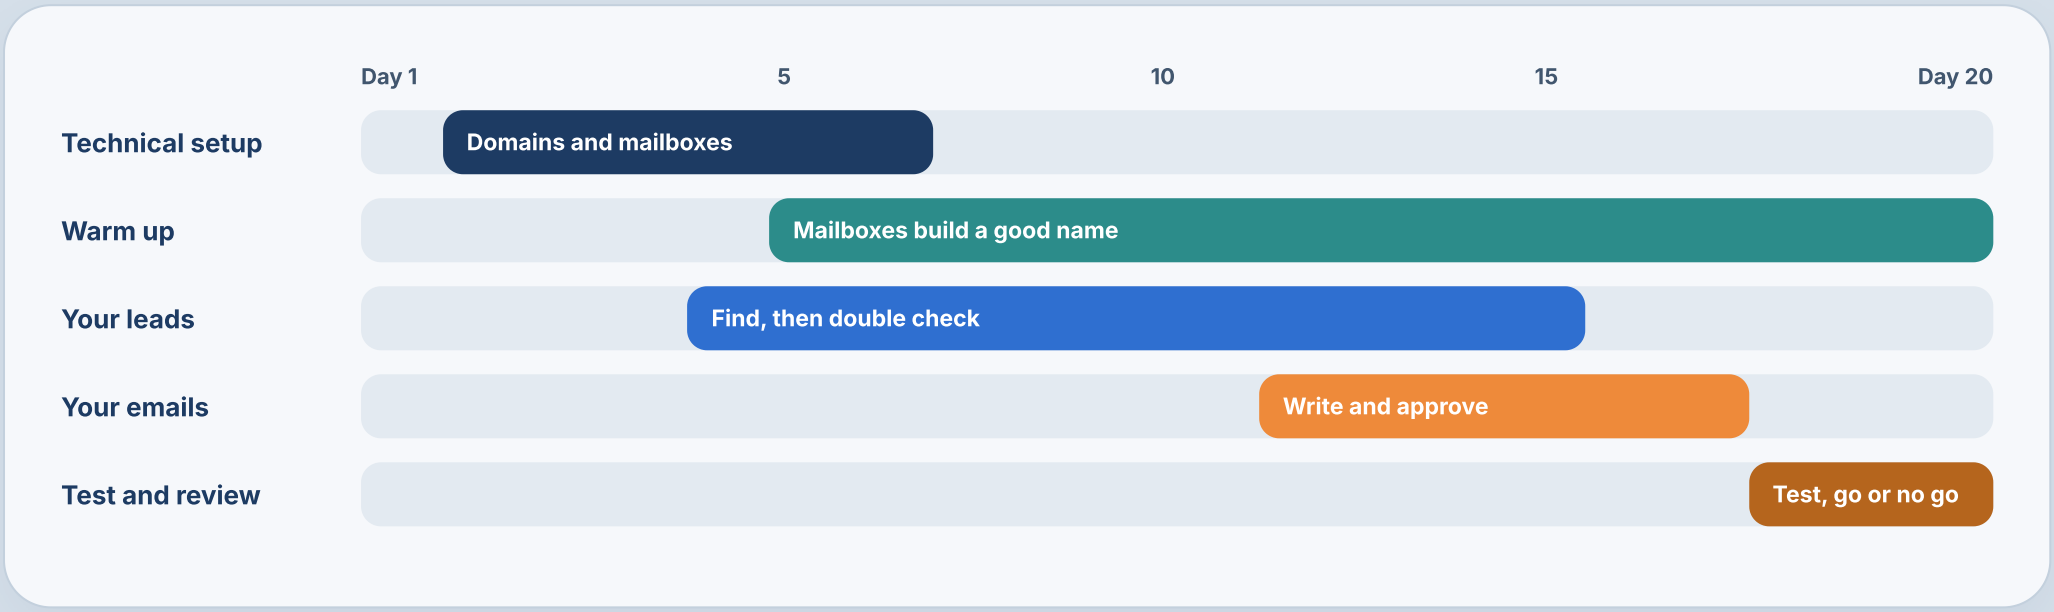

Planning numbers, not promises. We only go up when everything looks healthy.

DAYS 1 TO 20

We build your system, day by day.

We use professional tools to run this at scale. What matters is who sets them up and who watches them every day. The setup is done by hand, with care, not clicked through in an afternoon.

Days 1 to 2

Kickoff and study

A one hour call with you. We study your business and write your Business Brief. We agree who we go after first.

Days 3 to 4

We buy your sending addresses

About 16 web addresses that look like yours and point back to CashBack Realty. Your main website and your own email are never touched, so they stay safe.

Days 5 to 7

Mailboxes and technical records

We create about 80 real business mailboxes and set up the technical records that prove your emails are real. All by hand, one by one.

Days 6 to 20

Warm up

Every mailbox starts with a few safe messages a day and builds a good name with inboxes. We never rush this. It's the step most people skip, and the reason most campaigns fail.

Days 5 to 12

We find your people

We research businesses and people with a real link to property buying: partners, developers and serious investors in your market.

Days 10 to 16

Double check every lead

Two full checks, one by tools and one by a person. You'll see exactly what we look at in the leads section below.

Days 12 to 17

We write the emails

A short sequence of 2 to 3 emails, with several versions so they don't all look the same. You read every one and say yes or change it.

Days 18 to 19

Test everything

We send test emails to our own inboxes and see where they land. If anything looks off, we fix it before a single real email goes out.

Day 20

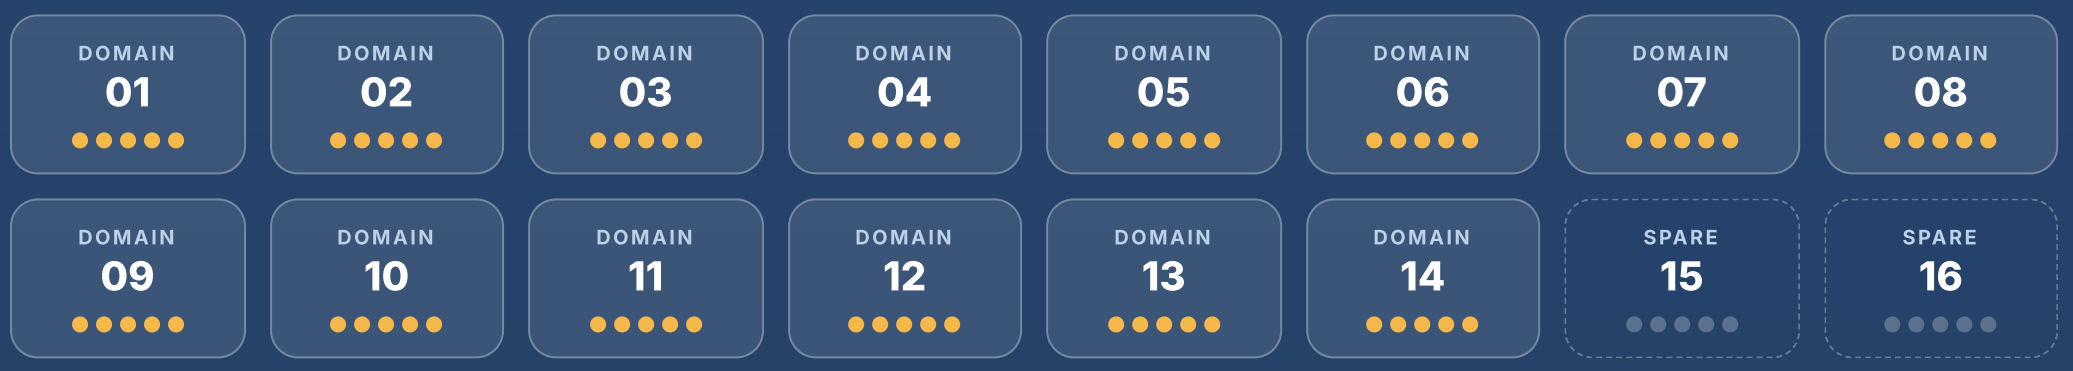

Go or no go

We sit down with you, show you what's ready, and agree to launch. Real sending starts the next day.

WHAT WE SET UP FOR YOU

Built to carry 30,000 emails a month.

Each address sends a small, safe amount every day. To reach your volume, we add more addresses. We never push one harder.

14 working addresses and 2 spares, each with its own mailboxes. When one gets tired, a warm spare takes over.

~16
sending addresses, including spares

~80
real business mailboxes

~1,400
emails a day on weekdays, at full pace

10k to 15k
new people a month, each getting 2 to 3 emails

YOUR LEADS

Two checks before anyone gets an email.

A big list isn't the goal. A clean, right list is. Every person goes through the same path before they are ever contacted.

1
Find
People with a real link to property buying in your market

2
Clean
Remove duplicates, generic inboxes, opt-outs and people outside Australia

3
Check the email
Every address tested. Bad ones are deleted

4
Check the business
Real, active, and relevant to what you offer

5
Check the person
Right role, still in it, and able to decide

6
Check they fit
Proof they can invest or bring buyers who can

Even a "yes" can be dropped.
If someone says they're interested but we can't see proof they fit, they don't go to you. We'd rather give you fewer people who are real than a long list of maybes.

Pass 1: by tools · Pass 2: by a person reading each one

THE EMAILS

Short, plain, and about them.

No long pitch. Each email talks about the other person's world first. Here is an example of the kind of first email we'd write for you. The final wording is written with you.

Example only, not final

To: a mortgage broker on the Gold Coast

Subject: your clients buying new builds

Hi [First name],

Quick one. We're a licensed Gold Coast agency. When someone buys a new or off-the-plan place through us, we share up to half of our commission with them. It's paid after settlement, and it's free for the buyer.

For your clients that can mean $10,000 to $30,000 back, and it doesn't touch the price or the loan.

Worth a quick chat to see if it fits the people you work with?

Cheers,
[Name], CashBack Realty

2-3
A short sequence
One first email, then one or two follow ups that add something new. Never "just checking in".

A/B
Several versions
We write more than one version and mix them, so emails don't look copied.

1st
A personal first line
Written by a person after looking at the business, not filled in by a machine.

OK
You approve everything
Nothing goes out until you've read it and said yes.

EVERY SINGLE DAY

We watch it like a hawk.

Every morning, before anything else, we go through the same checks. Problems show up early, before they cost you meetings.

- **Bounces**
  Are emails reaching real inboxes?
- **Sending health**
  Are all mailboxes connected and in good shape?
- **Replies waiting**
  Is every reply answered fast?
- **Opt-outs**
  Anyone who says stop is removed the same day.
- **Spam signals**
  Are inboxes still trusting us?
- **On schedule**
  Is today's sending going out as planned?

Our rule: if anything slips, we pause and fix it first. A slow day costs far less than a damaged system.

FROM REPLY TO MEETING

You only see people who are ready to talk.

Replies come to us. We talk to them, find out if they really fit, and only then put them on your calendar.

1. **A reply comes in**
   Someone says "tell me more"
2. **We answer fast**
   Same day, usually within hours
3. **We talk and check**
   Fit, ability to invest, and timing
4. **We book it**
   It lands in your calendar
5. **You get a brief**
   Everything they told us

Meeting brief

EXAMPLE

Who	[Name], [role] at [company]
Why a fit	Works with first-home buyers and investors on the Gold Coast
What they said	Interested in the cashback for clients buying off the plan
Good question	"How many of your clients are looking at new builds right now?"
Timing	Free Tuesday or Thursday

MONTH BY MONTH

What the 3 months look like.

After the 20 days, here's how each month goes and what you'll see.

MONTH 1

Slow and steady

- We start small and watch everything daily
- First replies come in and the first meetings land
- We learn which message and which people work best

about 10,000 emails
Careful on purpose

MONTH 2

Build up and tune

- We raise sending step by step
- We keep what works and cut what doesn't
- Lists get sharper, meetings build week by week

about 22,000 emails
Growing with the data

MONTH 3

Full pace

- Steady full sending, with more addresses added if needed
- We push toward 30 to 50 meetings a month
- End of month review and a plan for what comes next

30,000 emails and up
Where the goal lives

EVERY DAY
Health checks
Before anything else

EVERY WEEK
Report and call
Your numbers, plus a short call

EVERY MONTH
Review
What worked and what we change

END OF MONTH 3
The next plan
Where to go from here

HOW YOU'LL SEE IT

Clear numbers. Every week.

You'll always know what we did and what it led to. Layout below, your real numbers go in.

EMAILS SENT

MEETINGS HELD
00

REAL CAMPAIGNS

Not theory. We've done this.

Three real campaigns we've run for clients. Every business is different, so your own numbers will be your own.

MARKETING AGENCY

A steady flow, every week

Emails sent	82,671
Replies	2,429
Interested	2,146
Pipeline	$175,000

5 DAY PUSH

Fast and clean

Emails in 5 days	96,408
Replies	1,095
Interested	115
Calls booked	25

TEST CAMPAIGN

Small list, sharp offer

People contacted	10,284
Replies	417
Opportunities	103
Reply rate	4%

Pipeline is counted at our clients' average deal size. It is not closed revenue.

NEXT STEP

Here's what we need from you.

WHAT WE NEED

- → One hour for the kickoff call
- → A yes or changes on the emails within 2 days
- → Access to your booking calendar
- → The projects and developers you want pushed first
- → A real buyer story, with their OK
- → Quick replies to booked meetings. Warm people go cold fast

HOW WE START

1. You tell us you're ready
2. We send a one page agreement
3. Day 1: the kickoff call, and we start studying your business
4. Day 20: go or no go, together

Day 1 starts the day you say go.

If anything here doesn't sit right, tell us what's missing. We'd rather hear it now.

All outreach follows Australian spam and privacy rules. Volumes, timelines and goals shown are planning numbers based on our experience, not guarantees. Results depend on your market, your offer and how meetings are handled.
