CASHBACK REALTY × WAYNEFLOW

Not a campaign. A partner engine that keeps growing.

Who we reach, how we reach them, what we build, and what it can be worth to you. Built from your business and your market. A plan for years, with the first 4 months laid out day by day.

20 days
to build the system

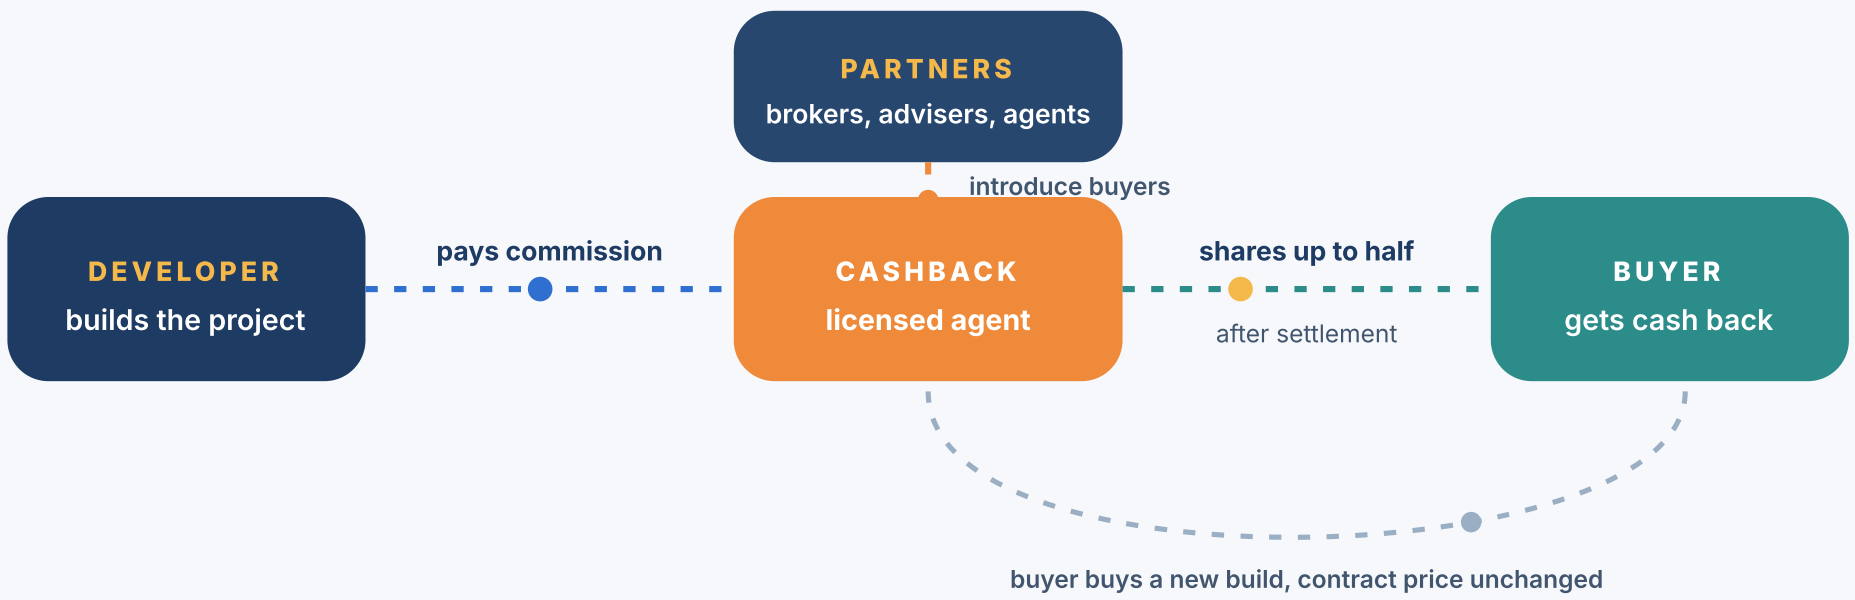

3 months
to launch and scale

Year 1+
partners that keep sending buyers

YOUR BUSINESS, IN ONE PICTURE

You make new-build property cheaper for the buyer, and safer.

We read your site and how you work. Developers pay you commission. You pass up to half back to the buyer after settlement. The buyer pays nothing extra, and the contract price doesn't change.

Your strong point

A simple offer that saves a real amount. Your site shows $10,000 to $30,000 as a normal range.

Your real edge

You vet developers and builders before you recommend them. In off-the-plan, trust sells more than price.

Your growth path

Buyers rarely find a rebate agent by chance. They hear about you from people they already trust.

Your team

Founder-led, with a team for client care and marketing. Enough to look after partners well.

What this means for the plan: we don't push your offer at strangers. We go to the people who talk to new-build buyers every week, and we make it easy and worth their while to send them to you. Partners are the engine. Email is how we find them.

YOUR MARKET RIGHT NOW

The Gold Coast is selling more new apartments, to a wider mix of buyers.

Public market data from 2026 (sources at the bottom of the page).

644
new apartment sales in the first half of 2026, up from 576 a year earlier

14
new projects launched in the March quarter, the most Urbis has recorded

37%
of buyers were owner-occupiers, down from over 60% five years ago

Local + interstate
investors and interstate buyers make up the rest, split about evenly

What it means for you. More projects means more developers who need buyers. More investors and interstate buyers means more people who use brokers, accountants and advisers, and those people are the ones we reach.

What to watch. Heavy new supply means buyers have more choice, so they compare. Your vetting and your cashback are exactly the reasons to pick one project over another.

YOUR AUDIENCE

Six groups. Each one gets a different message and a different job.

Not everyone gets the same email. We start with the groups that are the fastest and safest to win, and add the others as results come in.

Mortgage brokers

START HERE

WHY THEY SAY YES
Every new-build buyer needs a loan. Cashback helps their client, and they look good for bringing it.

THEIR WORRY
Is it legit, and will it cause trouble with the lender?

OUR ANSWER
Clear written terms, and wording your solicitor has approved.

Speed to win — High

Accountants, SMSF and planners

START HERE

WHY THEY SAY YES
Their investor clients ask where to put money. A vetted new build with cash back is an easy thing to mention.

THEIR WORRY
Their own rules on referrals and advice.

OUR ANSWER
An introduction only. We never touch their advice.

Speed to win — Good

Buyers' agents and property advisers

SECOND WAVE

WHY THEY SAY YES
They search for projects for clients all day. A trusted source of vetted new builds saves them time.

THEIR WORRY
Losing control of their client.

OUR ANSWER
Work alongside them, never around them.

Speed to win — Medium

Developers and project marketers

FEW, BUT BIG

WHY THEY SAY YES
They need buyers, now. A partner that brings qualified, vetted-minded buyers is welcome.

THEIR WORRY
Another agent adding noise.

OUR ANSWER
Fewer, better buyers, and simple reporting.

Speed to win — Slow, high value

Interstate and overseas investor channels

PHASE 2

WHY THEY SAY YES
Buyers who can't visit want someone local they can trust. Overseas buyers can generally only buy new builds.

THEIR WORRY
Distance and risk.

OUR ANSWER
Your vetting, plus a simple remote process. We reach them mostly on LinkedIn.

Speed to win — Medium

Buyers directly

NOT BY COLD EMAIL

WHY NOT EMAIL
Cold emailing everyday people is risky under Australian law, and it hurts a brand built on trust.

WHAT WE DO INSTEAD
Partners send them. Later: a better website, content and search, and a few ads, which you own and control.

Role in the plan — Long-term growth

The first 3 months focus on the first four groups. Groups five and six join from month 4.

HOW WE WORK FOR YOU

Four parts that feed each other.

We don't sell you "emails". We run the whole path from a stranger to a partner who sends you buyers, month after month.

1. Outreach

The right people get short, honest emails. Done at a safe, steady pace.

2. Meeting desk

We answer every reply, check the fit, and book it in your calendar with a brief.

3. Partner program

We help you turn a first meeting into a partner who keeps sending buyers.

4. Weekly learning

Every week we read the numbers and change what isn't working.

Where the real money is: one broker who sends you a buyer every two months is worth far more than one lucky reply. The plan is built to collect partners, because partners keep paying you back after we've stopped writing to them.

DAYS 1 TO 20

We build the system by hand, one day at a time.

We use professional tools to run this at scale. What protects you is how carefully each one is set up and watched. Keep scrolling and watch the days go by.

of 20

Warm-up running in the background

DAYS 1-2 — **Kickoff and study**
A one hour call. We study your business, write your Business Brief, and agree who we go after first.

DAYS 3-4 — **We buy your sending addresses**
About 16 web addresses that point back to CashBack Realty. Your main website and email are never touched.

DAYS 5-7 — **Mailboxes and technical records**
About 80 real business mailboxes, set up one by one, with the records that prove your emails are real.

DAY 6 ON — **Warm-up starts**
Each mailbox sends a few safe messages and builds a good name. We never rush this. It runs behind everything else until launch.

DAYS 8-12 — **We find your people**
We research brokers, advisers, agents and developers who really work with new-build buyers in your markets.

DAYS 11-16 — **Double check every lead**
Pass 1 by tools, pass 2 by a person reading each one. Details in the leads section below.

DAYS 13-17 — **We write the emails**
A 2 to 3 email sequence with several versions of each. You read every one and approve it.

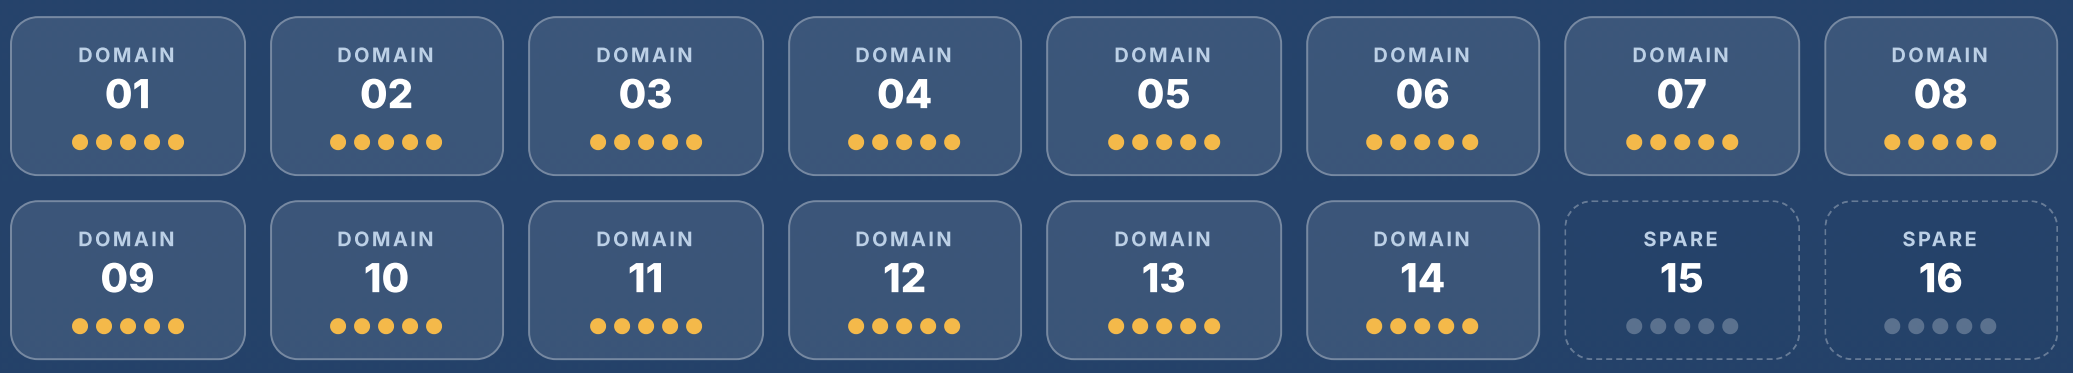

DAYS 18-19 — **Test everything**
Test sends to our own inboxes. We see where they land and fix anything off before real sending.

DAY 20 — **Go or no go**
We sit down together, show you what's ready, and agree to launch. Real sending starts the next day.

WHAT WE SET UP

Built to carry 30,000 emails a month, safely.

Each mailbox sends a small, safe amount a day. To reach your volume we add more addresses. We never push one harder.

14 working addresses and 2 warm spares, each with 5 mailboxes. When one gets tired, a spare takes over.

5 mailboxes × **20 emails a day** = **100 a day per address** × **14 addresses** = **1,400 a day**

Weekdays only, about 21 days a month, which gives roughly 30,000 emails. With 2 to 3 emails per person, that is about 10,000 to 15,000 new people each month.

YOUR LEADS

Two checks before anyone gets an email.

A big list isn't the goal. A clean, right list is. Every person goes through the same path.

1. **Find** — People with a real link to new-build buyers in your market
2. **Clean** — Remove duplicates, generic inboxes and anyone who opted out
3. **Check the email** — Every address tested. Bad ones are deleted
4. **Check the business** — Real, active and still working with buyers
5. **Check the person** — Right role, still in it, and able to decide
6. **Check the fit** — Proof they work with, or can bring, buyers who can really invest

Even a "yes" can be dropped.
If someone sounds interested but we can't see proof they fit, they don't go to you. You get fewer people, and they are real.

Pass 1: by tools · Pass 2: by a person reading each one

Playing by the rules: Australian law says we can only email business addresses that are published for work, and only about something related to that person's job. We say clearly who we are, and every email has a simple way to opt out. We never cold email everyday buyers.

THE EMAILS

Short, plain, and about them.

No long pitch. Each email talks about the other person's world first. Here is the kind of first email we'd write. The final words are written with you.

Example only, not final

To: a mortgage broker on the Gold Coast

Subject: your clients buying new builds

Hi [First name],

Quick one. We're a licensed Gold Coast agency. When someone buys a new or off-the-plan home through us, we share up to half of our commission with them. It's paid after settlement and it costs the buyer nothing.

For your clients that can be $10,000 to $30,000 back, and it doesn't touch the price or the loan.

Worth a quick chat to see if it fits the people you work with?

Cheers,
[Name], CashBack Realty

DAY 1

Email 1: the offer
Short and clear. One question at the end.

DAY 4

Email 2: something new
A real example, like a buyer's cashback on a recent project.

DAY 9

Email 3: an easy exit
A polite last note. If it isn't for them, they can say so.

Several versions of every email. We write each line more than one way and mix them, so no two inboxes see exactly the same message. A person writes the first line for every business, not a machine. You approve everything before it sends.

LAUNCH

Slow and gradual first. Full pace only when it's safe.

Sending too much too early is how good systems get damaged. So we start small and step up week by week, only while the health checks stay green.

Planning numbers, not promises. If anything looks unhealthy, we hold the pace or step back.

EVERY SINGLE DAY

We check it like a hawk.

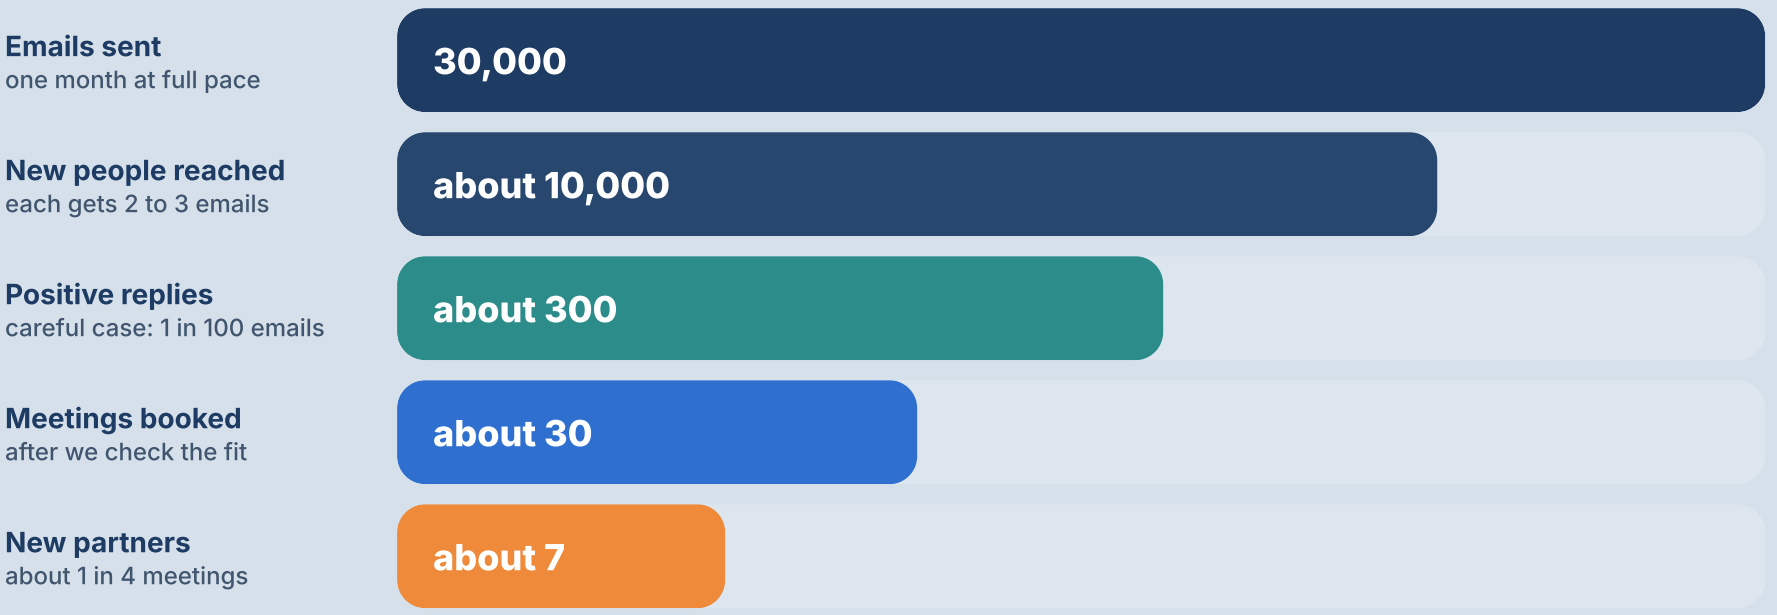

- **Bounces** — Are emails reaching real inboxes?
- **Sending health** — Are all mailboxes connected and in good shape?
- **Replies waiting** — Is every reply answered fast?
- **Opt-outs** — Anyone who says stop is removed the same day.
- **Spam signals** — Do inboxes still trust us?
- **On schedule** — Is today's sending going out as planned?

Our rule: if anything slips, we pause and fix it first. A slow day costs far less than a damaged system.

FROM EMAIL TO PARTNER

What 30,000 emails can turn into, in a careful month.

We plan on the low side on purpose. This is a careful case: only 1 in 100 emails gets a positive reply.

Replies come to us. We answer fast, talk to them, check the fit, and only then put them in your calendar with a brief.

Meeting brief

EXAMPLE

Who	[Name], [role] at [company]
Why a fit	Works with first-home buyers and investors on the Gold Coast
What they said	Interested in cashback for clients buying off the plan
Good question	"How many of your clients are looking at new builds right now?"
Timing	Free Tuesday or Thursday

AFTER THE MEETING

A meeting is not a partner. This is how we make it one.

Most agencies stop at the booked call. Your return starts after it. So we help you set up a simple partner program that makes sending buyers to you easy, and keeps you in their mind.

A one-page partner pack

What you offer, a worked example, simple terms, and a clear yes/no on how they can introduce a buyer.

Project sheets

One short sheet for each project you recommend, so partners can match a client in a minute.

An easy introduction

One link or one reply. No forms to chase. The buyer gets looked after from the first message.

A monthly market note

A short Gold Coast new-build update. It gives partners a reason to open your email every month.

Simple tracking

Who introduced whom, and where each buyer is. Partners trust you more when they can see progress.

Small events

A broker breakfast or a short online session with a developer. Face time builds long relationships.

WEEK 1
Thank you + pack
Same day as the meeting

MONTH 1
First introduction
We nudge, you deliver

EVERY MONTH
Market note
One useful email

EVERY QUARTER
Check-in
What's working for them

WHAT IT CAN BE WORTH

Try the numbers yourself.

Move the sliders. Partners add up month after month, so the result grows faster than the cost. The starting numbers are on the careful side.

Careful | Expected | Strong

Meetings a month at full pace 30

Months 1 and 2 start at a third and two thirds of this.

Meetings that become partners 25%

Buyers a partner sends each month 0.30

0.25 is one buyer every four months.

Buyers who go on to buy 25%

What CashBack keeps per sale $4,500

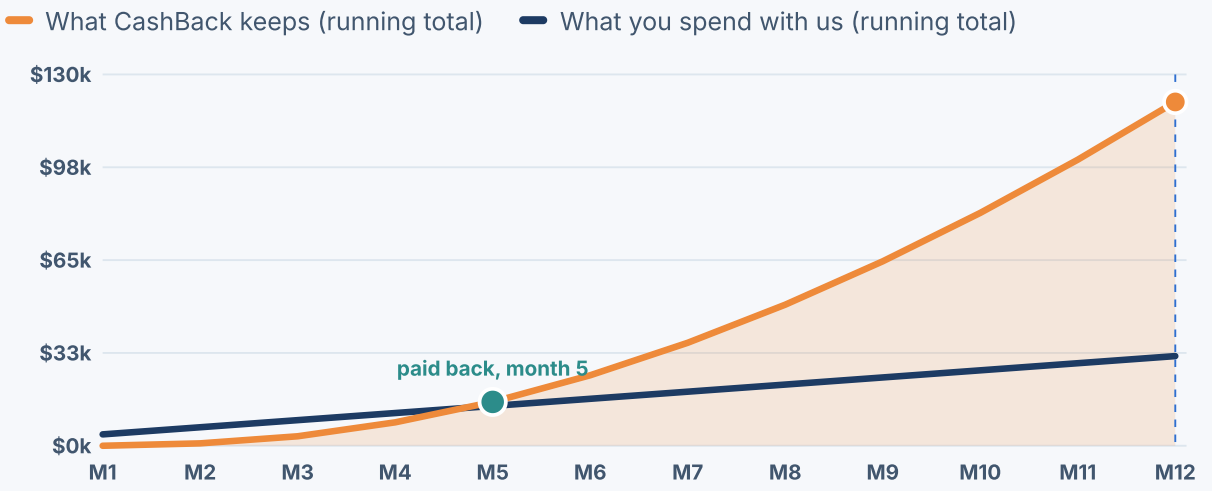

After the buyer's cashback and any partner fee. Please confirm your real figure.

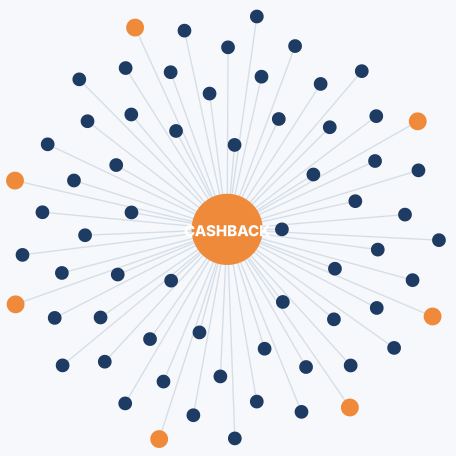

PARTNERS
65
active at month 12

SALES THAT MONTH
4.5
buyers who buy, month 12

KEPT SO FAR
$120,800
running total to month 12

PAID BACK
Month 5
total spent vs total kept

Your partner network

Each dot is a partner who is still active. Slide the month to watch it grow.

Month 12

Please read this part. These are planning numbers, not promises. We control the meetings. How many become partners and sales depends on your follow-up and your projects. Off-the-plan sales often pay out at settlement, months after the sale, so cash arrives later than the chart shows. By month 2 we replace every guess with your real numbers.

THE LONGER PLAN

The first 4 months are the start. Here is the year.

MONTHS 1 TO 4

Build and prove

- 20 day build
- Launch slowly, then step up
- Win the first partners
- Find the message that works

MONTHS 5 TO 6

Add and tune

- Add developers and advisers
- Start LinkedIn for interstate investors
- Launch the partner pack and market note

MONTHS 7 TO 9

Open the buyer door

- Rebuild the site for buyers
- Calculator and project pages
- Content and search, plus a few ads you control

MONTHS 10 TO 12

Widen the map

- Brisbane, Sydney and Melbourne partners
- More developers on your list
- A full year review and the next plan

A relationship, not a project.

We only do well if you do. So we keep the work honest, measure what matters, and tell you early when something isn't working. Every quarter we review together and decide what to do next.

STRAIGHT TALK

What could go wrong, and what we do about it.

Few replies

Any new message can start slowly.

We change one thing every week, and review the list, message and offer together in months 1 and 2.

Emails landing in spam

The most common way outreach fails.

Slow warm-up, spare addresses, daily health checks, and a rule to pause first.

Rules on email

Australian law is strict on unwanted messages.

Business contacts only, always about their work, clear sender, easy opt-out.

How the cashback is worded

Law societies have warned about some rebate styles, mainly when lenders aren't told. Your model, paid from your own commission with the contract price unchanged, reads differently.

Your solicitor approves the wording before it goes in any email or partner pack.

The market cools

Sales are strong now, with a lot of new supply arriving.

We don't depend on one group of buyers. Partners, developers and interstate buyers spread the risk.

Partners say yes, then go quiet

Common. Most people are busy.

The partner pack, the monthly note and a quarterly check-in keep you in front of them.

IDEAS TO MAKE YOU STRONGER

Things we noticed that will lift results.

A booking button

Next to "Get My Free Cashback Estimate", so warm people can book a call straight away.

Real buyer stories

Swap the one example for real stories with photos, with the buyer's OK. Proof closes deals.

A page for each project

Why you recommend it, the likely cashback, and a clear next step. These also help you show up in search.

A proper partner page

Your "Partner With Us" page can carry the pack, examples and a simple sign-up.

A plain-English FAQ

Lender, tax and legal questions answered clearly. It turns the biggest worry into a reason to trust you.

One shared scoreboard

Partners, buyers and sales in one simple view, so we both see what's working every week.

REAL CAMPAIGNS

Not theory. We've done this.

Three real campaigns we've run for clients. Every business is different, so your numbers will be your own.

MARKETING AGENCY

A steady flow, every week

Emails sent	82,671
Replies	2,429
Interested	2,146
Pipeline	$175,000

5 DAY PUSH

Fast and clean

Emails in 5 days	96,408
Replies	1,095
Interested	115
Calls booked	25

TEST CAMPAIGN

Small list, sharp offer

People contacted	10,284
Replies	417
Opportunities	103
Reply rate	4%

Pipeline is counted at our clients' average deal size. It is not closed revenue.

NEXT STEP

Here's what we need from you.

WHAT WE NEED

- One hour for the kickoff call
- A yes or changes on the emails within 2 days
- Access to your booking calendar
- The projects and developers you want pushed first
- Your solicitor's OK on the cashback wording
- A real buyer story, with their OK
- Quick replies to booked meetings. Warm people go cold fast

HOW WE START

1. You tell us you're ready
2. We send a one page agreement
3. Day 1: kickoff call, and we start studying your business
4. Day 20: go or no go, together
5. Every quarter: review and plan the next one

Day 1 starts the day you say go.

If anything here doesn't sit right, tell us what's missing. We'd rather hear it now.
